

Course content

The course content includes the following areas of biology:

DNA and the genome

The key areas covered are:

♦ structure of DNA	DNA-DNAStru
♦ replication of DNA	DNA-DNARep
♦ gene expression	DNA-GExp
♦ cellular differentiation	DNA-CellDiff
♦ the structure of the genome	DNA-GnStru
♦ mutations	DNA-Mut
♦ evolution	DNA-Ev
♦ genomic sequencing	DNA-GSeq

Metabolism and survival

The key areas covered are:

♦ metabolic pathways	MET-Paths
♦ cellular respiration	MET-CellResp
♦ metabolic rate	MET-Rate
♦ metabolism in conformers and regulators	MET-CR
♦ metabolism and adverse conditions	MET-AdvC
♦ environmental control of metabolism	MET-EnvCtr
♦ genetic control of metabolism	MET-GenCtr

Sustainability and interdependence

The key areas covered are:

♦ food supply, plant growth and productivity	SUS--Food
♦ plant and animal breeding	SUS--Brdg
♦ crop protection	SUS--CropP
♦ animal welfare	SUS--AnWlf
♦ symbiosis	SUS--Symb
♦ social behaviour	SUS--SocBvr
♦ components of biodiversity	SUS--BioDiv
♦ threats to biodiversity	SUS--Thrts
