

5. The viscosities of two liquids, X and Y, were investigated by dropping a metal ball into a tube of each liquid.

The diagram shows the position of the metal balls after 10 seconds.

Which line in the table correctly describes the viscosity and relative strengths of the van der Waals forces in liquids X and Y?

	X	Y
A	most viscous	strongest van der Waals forces
B	least viscous	weakest van der Waals forces
C	least viscous	strongest van der Waals forces
D	most viscous	weakest van der Waals forces
