

3. HCl has a higher boiling point than H₂ because:

- A the polar covalent bonds in HCl are stronger than the covalent bonds in H₂
- B the polar covalent bonds in HCl are stronger than the van der Waals' forces in H₂
- C the van der Waals' forces in HCl are stronger than the van der Waals' forces in H₂
- D the van der Waals' forces in HCl are stronger than the covalent bonds in H₂.
