

15. Some energy values associated with a chemical reaction are shown in the table.

Activation energy of forward reaction (kJ mol^{-1})	Activation energy of reverse reaction (kJ mol^{-1})
165	179

What is the enthalpy change for the forward reaction?

- A -14 kJ
- B $+14 \text{ kJ}$
- C -344 kJ
- D $+344 \text{ kJ}$
