

Course content

The course content includes the following areas of chemistry:

Chemical changes and structure

The topics covered are:

- | | |
|---------------------------------|----------|
| ◆ periodicity | CSS-PER- |
| ◆ structure and bonding | CSS-SB- |
| ◆ oxidising and reducing agents | CSS-OXR- |

Nature's chemistry

The topics covered are:

- | | |
|-------------------------------|---------|
| ◆ systematic carbon chemistry | NC-SCC- |
| ◆ alcohols | NC-ALC- |
| ◆ carboxylic acids | NC-CA- |
| ◆ esters | NC-EST- |
| ◆ fats and oils | NC-FO- |
| ◆ soaps | NC-S- |
| ◆ detergents and emulsions | NC-DE- |
| ◆ proteins | NC-P- |
| ◆ oxidation of food | NC-FOX- |
| ◆ fragrances | NC-FRA- |
| ◆ skin care | NC-SC- |

Chemistry in society

The topics covered are:

- | | |
|-----------------------------------|---------|
| ◆ getting the most from reactants | CS-GMR- |
| ◆ controlling the rate | NC-CR- |
| ◆ chemical energy | NC-CEN- |
| ◆ equilibria | NC-EQ- |
| ◆ chemical analysis | NC-CA- |

Researching chemistry

The topics covered are:

- | | |
|--------------------------------|---------|
| ◆ common chemical apparatus | RC-CCA- |
| ◆ general practical techniques | RC-GPT- |
| ◆ reporting experimental work | RC-REW- |
