

SECTION 2 — DATABASE DESIGN AND DEVELOPMENT — 25 marks

Attempt ALL questions

12. A dog walking company uses a relational database to store details about the dogs that they take on walks.

Customer	Dog	Walk	Staff
<u>custID</u> forename surname address mobileNo	<u>dogID</u> name breed age custID*	<u>walkID</u> route dogID* walkerID* date	<u>walkerID</u> forename surname mobileNo

Draw an entity-relationship diagram to show the relationships that exist in this database.

Your answer should show the entity names and cardinality.

Attributes are not required on the diagram.
