

Section 1 — DNA and the Genome

Key Areas:

- DNAStr - Structure of DNA
- DNAREp - Replication of DNA
- GXP - Gene expression
- CellD - Cellular differentiation
- GMStr - The structure of the genome
- M - Mutations
- Ev - Evolution
- GSeq - Genomic sequencing

Section 2 — Metabolism and Survival

Key Areas:

- MetP - Metabolic pathways
- CellR - Cellular respiration
- MetR - Metabolic rate
- MetCR - Metabolism in conformers and regulators
- Met-AdvC - Metabolism and adverse conditions
- Met-EnvCtrl - Environmental control of metabolism

- MetGCtrl - Genetic control of metabolism

Section 3 — Sustainability and Interdependence

Key Areas:

- F - Food supply, plant growth and productivity
- B - Plant and animal breeding
- CPr - Crop protection
- AW - Animal welfare
- S - Symbiosis
- SB - Social behaviour
- BDivC - Components of biodiversity
- BDivThr - Threats to biodiversity
