

2018-Ph-H1-Q23

Section: Particles and Waves

Topic: Nuclear Reactions

Which of these is a **fusion** reaction?

- A. Large nucleus splits
- B. Neutron captured by a nucleus
- C. Small nuclei join
- D. A nucleus emits a beta particle

Solution:

Fusion = joining of **small** nuclei to form a larger one.

Answer: C

Revision Tip:

- Fusion: small + small $\rightarrow$ big
- Fission: big $\rightarrow$ smaller pieces
- Fusion powers stars, fission powers nuclear reactors.
