

2018-Ph-H1-Q24

Section: Our Dynamic Universe

Topic: The Expanding Universe

What observation provides evidence for the universe expanding?

- A. Blue shift
- B. Red shift
- C. Cosmic ray detection
- D. Microwaves from the Sun

Solution:

Red shift shows that galaxies are moving away — key evidence for expansion.

Answer: B

Revision Tip:

Red shift = wavelength increase = moving away.

Hubble's Law: galaxies farther away are receding faster.
