
2019-Ph-H1-Q10

Section: Our Dynamic Universe

Topic: Motion, Equations and Graphs

Question:

Which of the following graphs represents constant velocity?

Answer:

A **horizontal line** on a **velocity-time graph** represents constant velocity.

Correct Option: D (v - t graph, straight horizontal line)

Guidance for Students:

Don't confuse position-time and velocity-time graphs — they show different things.

Revision Tips:

- v - t graph:
 - flat line = constant velocity
 - sloped line = constant acceleration
 - s - t graph:
 - straight line = constant velocity
 - curved line = acceleration
