

2022-Ph-H1-Q12

Section: Our Dynamic Universe

Topic: Energy and Power

Which statement about conservation of momentum is correct?

Answer: B

(Total momentum is conserved in the absence of external forces.)

Guidance for Students:

Momentum is conserved **only** if there are no net **external forces** — this is a key condition.

Revision Tips:

- Momentum conserved if system is isolated.
- Total momentum before = total after.
- Use $p = mv$ and remember it's a vector!
