

2022-Ph-H1-Q8

Section: Our Dynamic Universe

Topic: Forces, Energy and Power

Which situation represents unbalanced forces?

Answer: E

Explanation:

The object is **accelerating**, which only happens when the forces are **unbalanced**.

Guidance for Students:

Look for motion that changes — speeding up, slowing down, or changing direction — all imply a net force.

Revision Tips:

- Balanced forces → constant velocity.
- Unbalanced forces → acceleration.
- Acceleration implies net force $\neq 0$.
