

2023-Ph-H1-Q21

Section: Electricity

Topic: Current, PD, Power, Resistance

Which row shows the correct units for resistance and current?

Answer: A

(Ohm, ampere)

Guidance for Students:

This is about **SI units**.

- Resistance → ohm (Ω)
- Current → ampere (A)

Revision Tips:

- Voltage (V), Current (A), Resistance (Ω)
- Ohm's Law: $V = IR$
- Power units: watts (W) = joules/second
