

2023-Ph-H1-Q24

Section: Electricity

Topic: Semiconductors

Which device allows current in one direction only?

Answer: C

(Diode)

Guidance for Students:

A **diode** is a semiconductor that:

- **Conducts in one direction**
- **Blocks in reverse direction**

Revision Tips:

- Used in rectifiers, LED circuits
- Symbol: triangle + bar
- LEDs are light-emitting diodes (need correct polarity!)
