

2023-Ph-H1-Q7

Section: Particles and Waves

Topic: Refraction of Light

Light passes from air into glass. Which statement is true?

Answer: C

(Speed decreases and direction changes)

Guidance for Students:

Refraction occurs when light changes speed between media. It **slows down** in glass and bends **towards the normal**.

Revision Tips:

- Light slows down in denser media.
- Use Snell's Law: $n = \frac{c}{v}$
- Bends **towards** normal when entering denser material.
- Frequency stays the same; wavelength changes.
