

4. A block of wood of mass 3.5 kg slides down a slope. The block of wood has a constant acceleration of 2.3 m s^{-2} down the slope.

The force of friction acting on the block is 6.4 N .

The angle of the slope θ is

- A 2.8°
- B 11°
- C 14°
- D 25°
- E 65° .
