

6. A ball of mass 0.164 kg is dropped from rest and falls towards the ground. The ball collides with the ground and rebounds upwards. The speed of the ball just before it hits the ground is 4.85 m s^{-1} . The ball is in contact with the ground for 0.180 s . The speed of the ball immediately after it rebounds from the ground is 3.96 m s^{-1} . The mean force exerted by the ball on the ground during the collision is

- A 0.146 N
- B 0.811 N
- C 0.645 N
- D 1.44 N
- E 8.03 N .
