

8. The Queensferry Crossing has a length of 2700 m as measured by a stationary observer on Earth.

A spaceship travels past Earth at a constant speed of $1.80 \times 10^8 \text{ m s}^{-1}$ relative to Earth.

The length of the Queensferry Crossing as measured by an observer on the spaceship is

- A 1100 m
- B 1700 m
- C 2200 m
- D 3400 m
- E 4300 m.
