

13. The output from a signal generator is connected to the input terminals of an oscilloscope.
- The trace observed on the oscilloscope screen and the Y-gain setting are shown.
- The timebase setting is not shown.
- The frequency of the signal displayed on the oscilloscope is 250 Hz.

- (a) State what is meant by the term *alternating current (AC)*.

1

- (b) Determine the rms voltage of the signal.
